PROFILE

Senior frontend developer focused on the space where product intent meets implementation. I turn complex ideas into clear, fast, and accessible interfaces, working closely with product, design, and engineering teams from early decisions through production delivery.

PRODUCT	ENGINEERING	VISUAL CRAFT
Product thinking, interface hierarchy, workflow design, rapid prototyping	React, Next.js, TypeScript, architecture, testing, performance	Design systems, responsive UI, accessibility, thoughtful motion

SELECTED PRODUCT WORK

Analytics workspace

Lead frontend engineering

Modular product analytics, typed data UI, resilient loading and error states.

Commerce operations

Senior frontend developer

Design-system consolidation, responsive workflows, performance-first delivery.

Financial client portal

Frontend architecture and UI

Clear information hierarchy, keyboard-first flows, dependable data states.

WORKING PREFERENCES

Remote full-time

Selected contracts

Cross-functional product teams
